Released: May 21, 2012 Vol. 49 No. 11

**Agricultural Summary:** Colorado experienced below average precipitation with slightly above average temperatures last week. High winds, combined with the limited moisture, raise concerns over the availability of soil moisture later in the growing season. Overall, the mountain snowpack is 9 percent of average. Farmers were allowed 6.5 days in the field for spring operations.

TOP SOIL MOISTURE BY PERCENT					
	Very Short	Short Short Adequate		Surplus	
This Week	12	32	53	3	
Last Week	10	29	58	3	
Last Year	21	17	58	4	

SUBSOIL MOISTURE BY PERCENT					
	Very Short	Very Short   Short   Adequa		Surplus	
This Week	15	38	47	0	
Last Week	14	39	47	0	
Last Year	25	24	49	2	

**Small Grains:** Winter wheat progress increased to 90 percent headed, 62 percentage points ahead of the 5-year average. Seven percent of the crop was reported turning color as of last week. The crop was rated in mostly good to fair condition. Spring barley was 99 percent seeded and 92 percent emerged by the end of the week with the crop rated in mostly good to fair condition. Spring wheat was reported 98 percent seeded and 75 percent emerged at week's end. The crop was reported in mostly good condition.

Row Crops: Corn progress increased to 94 percent planted, 13 percentage points ahead of the 5-year average with 60 percent emerged. The crop was rated in mostly good condition. The onion crop was rated in mostly good condition. Summer potatoes were 80 percent emerged as of last week compared to the 5-year average of 16 percent and rated in mostly good condition. Fall potato plantings last week increased to 81 percent planted with 3 percent emerged. Sugarbeets reached 75 percent up to stand with the crop rated in good condition. Sorghum progress increased to 27 percent planted while dry bean progress

increased to 18 percent planted. Sunflower planting reached 16 percent by the end of the week.
